

## Company Profile & Capabilities

Sheers Limited, Morton Park Way, Darlington, DL1 4PQ

Tel: 01325 353337

### Capabilities

=====

Clean & Waste Water Treatment

Process & Engineering Services

Renewable Energy Systems

=====

### Services

=====

Site Surveys

Process Design

Mechanical Design

Electrical Design

Control & Instrumentation

System Integration

Project Management

Installation

Commissioning

Training

Service & maintenance

=====

**Sheers Limited are a privately owned company, formed in 1978 and based in Darlington in North-East England.**

We supply high quality engineered systems, providing the optimum technical solution to the problem in hand, at the optimum whole life cost. This achieved by developing a thorough understanding of our customers' business and requirements.

Sheers have developed strong professional relationships with our customers and we share many goals with them. As a relatively small company, generally supplying consultancy, products and services to a far larger end user, our policies and procedures have been driven by, and evolved to add value to, our clients operations - this is especially true within the areas of HS&E, Quality and Corporate & Social Responsibility (CSR).

We believe in working with our customers in the development of mutually beneficial products, services, policies and procedures and it is this collaborative approach that forms the basis of our successful partnerships.

Our performance is routinely measured and reported by ourselves and our customers utilizing a range of clearly defined KPIs, and we constantly review our performance and implement any corrective actions necessary to ensure that we continue to add value to customer and our own operations. We consider our reputation within our customers' organizations to be of paramount importance.

We have a broad portfolio of standard, verified designs available but are, of course, happy to work with our customers to develop bespoke systems where the need arises.

**Please contact us directly to find out more or discuss specific requirements in more detail.**

# Recent Projects

Chlorine Gas Disinfection

Solar PV Installation

Hypochlorite Dosing & Control

Sulphur Dioxide

Sodium Bisulphite

UV Disinfection

Chlorine Dioxide

Fluoridation

Ammonia Gas

Ammonium Sulphate

Chloramination

Ferric Chloride

Ferric Sulphate

Phosphoric Acid

Slaked Lime

Hydrated Lime

pH Correction

Activated Carbon

# Example Applications & Technologies

## Clean Water

### Disinfection

- Chlorination
- Chloramination
- UV
- Hypochlorite
- Electrochlorination

### Fluoridation

### GAC

### pH Correction

### Mixing

### Flocculation

### Sedimentation

### Filtration

### Softening

### Desalination

### Dechlorination

### Plumbosolvency Control

### Analyser & Control

### Systems

## Waste Water

### Odour Control

### Screening

### pH Control

### Phosphate Removal

### Clarification

### Aeration

### Sludge Thickening

### Sludge Dewatering

### (De)nitrification

### Filtration

### MBRs

### Mixing

### Disinfection

### Dechlorination
